

P48 Loudspeaker

Available in a Freestanding version.

P48 Loudspeaker

The P48 shares much in common with the P38, except that its design was specifically targeted for freestanding applications. It is not available in in-wall or on-wall versions. The P48 is not a line source like the L75 and L150i, but is instead a point source loudspeaker. The vast majority of loudspeakers available in the world are point sources, meaning that they radiate their sonic energy outward in an expanding sphere, as though from a point in space.

The P48 is available in a freestanding version only, and sharing the same driver technology, it is timbre matched and can be combined with other Sage Series in-wall, on-wall and freestanding models as is desired for the specific installation. Slim and elegant in design, the P48 blends nicely into a variety of décors where traditional loudspeakers might otherwise intrude excessively on the room's appearance. Constructed entirely from machined and extruded aircraft grade aluminum, the clear anodized interlocking trim bezels and matte charcoal colored cabinet convey an exquisite balance of industrial design and build quality unique among consumer loudspeakers.

Four of the same high operating pressure 6-inch woofers used in the L75 and L150i mate with a unique MTM Planar Magnetic Driver array for the midrange and treble. The MTM array provides the same level of transparency, detail, and instantaneous dynamics as the 24-inch Planar Magnetic driver used in the L75 and L150i (in multiples), but is a much smaller package optimized for the space requirements associated with the P48 and other more compact Sage Series models. The MTM array incorporates a groundbreaking 2-inch planar magnetic tweeter and two 2-inch midrange drivers. This combination of unique transducers is responsible for this series' characteristic transparency, detail and instantaneous dynamics, extending all the way down to 650 Hz.

As with all Sage Series systems, the 7.3 channel SC-1 System Controller is the heart of the system. It provides the active crossover between bass and midrange/treble, system-specific EQ, as well as Audyssey MultEQ® XT room correction on all 17 output channels for consistent no-compromise performance in every installation.

The P48 sonically presents itself in a room with the convincing authority normally associated with much larger loudspeakers. Employing planar magnetic drivers for the majority of its output, it is incredibly detailed and dynamic, and does not suffer from the sonic compression that plagues many conventional loudspeaker designs. The P48 provides stunning, lifelike dynamic music reproduction that belies its small footprint. Capable of the volume and dynamics normally

associated with a live performance, the P48 can fill a large space with ease. This compact system is an ideal solution for those listeners demanding a high resolution, low compression loudspeaker with a refined, contemporary, slim appearance that integrates easily with a range of décors.

P48 Specifications

All specifications are subject to change at any time, in order to improve the product.

Frequency response	40Hz – 20kHz ± 2dB relative to the target curve
Frequency response, 30° off horizontal axis	40Hz – 18kHz ± 2dB relative to the target curve
Impedance, planar section	3 ohms
Impedance, woofer section	3 ohms
Sensitivity, planar section	90 dB / 2.83 V / 1m
Sensitivity, woofer section	91 dB / 2.83 V / 1m
Shipping weight:	
<i>each P48</i>	58 lbs. (26 kg)
<i>pair of P48 bases</i>	22 lbs. (10 kg)
